Expanding our Reach in North America

Our local capabilities are powered by the depth of a global group

Our presence in the U.S. continues to grow — anchored by our Washington D.C. office, we’ve expanded through strategic projects, strengthened partnerships, and a growing local team. This reflects both the trust our clients place in us and our deepening commitment to the North American market. Today, we deliver integrated services across three core sectors: Tunnels & Underground Structures, Hydropower, and Bridges. Backed by strong local teams, we offer end-to-end solutions — from concept through design — tailored to the unique demands of each project and client. Our local capabilities are powered by the depth of a global group with decades of experience in complex infrastructures.

While our focus in North America is rooted in today’s infrastructure needs, we are constantly looking ahead — drawing on international expertise to help shape resilient, sustainable, and intelligent systems.

We’re proud of the progress we’ve made and even more energized by the opportunities to help our clients build what’s next.

Roberto Schürch
Chief Regional Officer North America

multidisciplinary
teams are made
of**

People

We are a comprehensive network of specialists, always integrating talent and expertise. Tackling complex design projects, ARX adapts and evolves with the dynamic and challenging global landscape. Continual evolution leads to continual growth.

Experts

We are experts in select design disciplines, combining deep technical specialization with the ability to lead broad, multidisciplinary projects. This versatility empowers us to tackle challenges of any scale — from the highly precise to the broadly complex — with confidence.

ARX North America

Building the Future: ARX’s Commitment to Innovation and Community

Since its establishment in September 2022, Pini Group USA, now ARX, has been at the forefront of delivering cutting-edge engineering and consulting services across North America. As the Managing Director, I am proud to lead a team that embodies ARX global expertise while deeply engaging with local communities. Our growth is a testament to our commitment to excellence and our clients’ trust in our capabilities.

At ARX we prioritize innovation, sustainability, and inclusivity. Our diverse team collaborates to address complex engineering challenges, ensuring that our projects not only meet technical standards but also contribute positively to the communities we serve.

North America Projects

Brief technical overview

Competences

Geology & Geotechnical

We bring deep expertise in geology and geotechnical engineering, with proven experience across diverse underground projects. Our team excels in site characterization, geotechnical data analysis, and predictive ground behavior modeling, supported by advanced 3D tools and simulations. Competences include TBM parameter optimization, ground support design, SEM, groundwater control, and risk management for mixed-face and high-pressure conditions, ensuring safe and resilient underground infrastructure.

Structural

Our structural engineering expertise spans complex permanent works and innovative temporary works. We have delivered challenging bridges, underground structures, and heavy civil components with a focus on safety, durability, and constructability. Our competencies include structural design in steel, concrete, and composite systems, seismic and dynamic analysis, and optimized temporary works such as shoring systems, cofferdams, and TBM support structures. We also have specialized experience in the design and delivery of signature and complex bridges, with particular expertise in cable-stayed structures.

Hydropower

We provide integrated design solutions for hydropower and pumped storage plants, combining civil, hydraulic, mechanical, and electrical expertise. Our capabilities cover waterways, caverns, pressure shafts, intakes, and powerhouse structures, as well as electro-mechanical integration. Specialized knowledge in transient hydraulic analyses -covering water hammer, surge control, and system stability- ensures safe and reliable operation of high-head and pumped storage schemes.

Digital Modelling

From concept to full LOD500 implementation, we deliver advanced digital modeling solutions that enhance coordination and constructability. With global project experience, our team develops 3D/4D/5D models, digital twins, and clash detection systems, using BIM as a powerful tool for logistics planning, sequencing, and schedule optimization, helping projects anticipate challenges and stay aligned with critical paths.

Construction Management

We offer complete construction management services for major infrastructure projects worldwide. Our Innovation & Global Academy approach combines international best practices with local adaptability, ensuring efficiency, safety, and quality. Competences include integrated engineering and logistics, sequencing optimization, risk management, and implementation of innovative methods that reduce time and cost without compromising safety standards.

Like an explosion of color, ARX has dramatic reach and vibrant potential. We celebrate our wide spectrum of expertise. At our core, we contain rare elements: unique thinkers and creators.

Racing towards a future of efficiency and sustainability. ARX is driven by these individuals. With every team member exploring the borders of what we know, our impact grows, and our potential expands. The ARX universe is a nexus of talent and innovation, where infinitely more is possible.

We are transforming communities one at a time, remaining focused on our mission:

Make it happen
